

Professional Profile

Robert Tomlinson BEng (hons)

Background

Graduating with a Bachelor of Engineering in Manufacturing Systems, Rob has been implementing business improvements for nearly two decades. Having always saved businesses more than he costs, Rob is justifiably proud of his achievements. Incremental Improvements Australia was started to allow Australian businesses of all sizes to benefit from Rob's knowledge & skills.

Skills Overview

Rob has worked at many levels, up to Senior Management, in an array of company sizes from those with less than 50 employees to multi-national corporations.

Specific training and extensive experience in the manufacturing arena allows Rob to quickly identify problems and formulate solutions to the types of hidden issues that typically slow cash flow and reduce sales capacity. By unlocking the potential of processes, Rob can quickly release extra volume for the same cost base or offer alternative cost saving solutions to the issues found.

Moreover, having formal management and training qualifications, Rob can quickly and clearly communicate proposals to all business levels, assisting in the rapid implementation & training required for the solutions to be a business success.

Additionally, assistance with formalising processes is a key strength. Experience with implementation and certification of ISO compliant systems brings the knowledge required to construct a robust monitoring and reporting process, if this is required.

Rob has a very broad, strong skill set, with specific operational and industrial experience. He also has Lean & Competitive Manufacturing skills that are backed up by various nationally recognised qualifications, a University Degree, plus holds a Methods and Time Management qualification. Concise management and communication skills are also an asset.

Rob has various professional memberships that ensure continual professional development whilst also linking into an impressive array of professional bodies and networks.

CLIENT FEEDBACK AND TESTIMONIALS

Lang Semmler, Operations Manager, Cathodic Diecasting

"You are a very good Consultant, it is a luxury to have you at arm's length here on the Sunshine Coast. We have built a very good business over the last 20 or so years, but when it comes to talking all the educated jargon and industry abbreviation I can get left behind. This is why I so greatly and genuinely appreciate the efforts, patience and understanding of people like yourself."

Andrew Eves-Brown, Head of Operations, Gourmet Garden (Botanical Food Company)

"Your style and enthusiasm is in keeping with the culture of Gourmet Garden. I feel your personality allowed the group to feel more comfortable and have a belief in what you are presenting, your interaction with the group was very genuine and it was obvious that a good relationship was established with the group."

Rod Matthews, Manager, CPM Engineering

"Your presentation is excellent, with a pleasant personality, a likable speech accent, and a good knowledge ... we find little for you to improve. The feedback I hear from employees is positive and they all appreciate the new ideas, so simple yet overlooked in everyday working life."

Amelia Bradshaw, HR Manager & WHSO, Bradco Commercial Joinery

"We have seen significant improvements in areas of our manufacturing, changes in our office, improvements in quality and team building. I along with senior management attribute a significant amount of this continuous improvement to the skills, knowledge and dedication of the trainer Rob Tomlinson. Rob goes above and beyond his training in giving templates, advice, help and knowledge whenever asked either by employees or management."

Robert Bright, Enterprise Connect Business Advisor, CCIQ

"Robert is a very professional and capable adviser that comes with high regard from all his clients. I have seen the quality of his work and the results he has driven and have no hesitation in recommending his services."

Scott Breust, Senior Regional Development Officer, Department of Employment Economic Development and Innovation

"I have received positive feedback from businesses that Rob has worked with. Rob is passionate about helping clients with Productivity Improvement including "Lean Manufacturing."

Warren Beal, Productivity Coach, Improve Group Qld

"Rob has worked in a variety of roles reviewing and improving work practices and performance. Intelligent, very down to earth and approachable, Rob can take a strategic outlook at a business and work with Senior Executives but is equally capable and comfortable in bringing about change by working with Staff at the Factory level. Rob is quick to assess a situation and develop a recommendation for improvement activities. My dealings with Rob have always been exciting, interesting, productive and effective, as well as being professional and fun. I'm sure that given the opportunity, Rob will add considerable value to any organisation with which he becomes associated."

David Taylor, Project Support Manager, QMI Solutions

"Robert is a reliable and proactive consultant. He is responsive in always meeting our timeframes and other requirements."

FUNDING ELIGIBILITY ASSESSMENT

Can We Assist You?

We may be able to acquire funding from various sources that you can use to meet part of the cost of our (or indeed other) services. We can arrange for you to be assessed for eligibility if you provide us with the following information:
